Profile

I am **Bandar**, a passionate **cybersecurity** specialist and **full-stack web developer**. I am dedicated to protecting digital spaces and building powerful, secure web applications.

Projects

Secure Password Generator

A fast, secure, and multilingual web tool for generating strong and memorable passwords.

2025

A multilingual web tool that generates strong, customizable, and easy-to-remember passwords, supporting light/dark themes and ensuring privacy with no data storage.

Tech stack: Python (FastAPI), HTML, CSS, JavaScript, Render.

Saudi font

Frontend Tool for Text Styling and Exporting

2025

A lightweight and fast web tool that allows users to preview and customize text using the official

Saudi font. Features include font weight selection, font sizing, color customization, text alignment, and exporting the text as a high-quality image. Fully built using HTML, CSS, and JavaScript with no **backend**.

Languages

Arabic • English
